

- 8 = "hello"
- 44 = "repeat"

Astra Lingua Cheat Sheet

Pronunciation

Each trit is pronounced using one of three sounds that can vary by species:

- Some use pitch (high "a", medium "a", low "a")
- Some use duration ("aaa", "aa", "a")
- Some use sound ("a", "e", "i")

Since the word for "hello" ("I-I-II-II-III-III") contains the three sounds in order, it is used to calibrate between species.

The official sounds for Konekomi are "a" (high "a"), "o" (medium "a"), "u" (low "a"). They can also hum pitches of "m" or "n".

Glyphs

Numbers are written inside brackets:

- "[I-I-II-II-III-III]" = 105

The full list of glyphs used in Astra Lingua:

- I
- II
- III
- [
- >

Signs

-  (One Direction, Rocket)
-  (Two Directions, Spaceship)
-  (Four Directions, Star)
-  (Increase, Big Circle)
-  (Decrease, Small Circle)
-  (No Change, Hollow Circle)

Transliteration

The official transliteration symbols are:

- a (I)
- o (II)
- u (III)
- [...] ([...])
- / (>)
- ? (-)
- . (=)
- ! (≡)

When transliterating, insert spaces between words and add tones at the end of words:

- "aaoouu aaoauaaaaouo!!"

Konekomi Dialect

The Konekomi dialect of Astra Lingua adds three feeler vibrations to indicate tone:

- 1 (uncertain / question)
- 0 (neutral / expressionless)
- T (urgent / emphasis)

The tone is denoted with horizontal lines:

- - (?) (uncertain / question)
- = (.) (neutral / expressionless)
- ≡ (!) (urgent / emphasis)

The tone can be elongated for intensity or combined with other tones:

- —— (very confused)
- ≡ (slightly surprised)
- ==- (pretty sure)

The tone is denoted after each word:

- I-I-II-II-III-III——≡≡ ("hello??!!")
